

# Picture Install Guide (9 Easy Steps)

## Step ZERO

Close ALL RuneLite Clients before continuing

## Step 1

The screenshot shows the 'Download Launcher' interface. At the top, it says 'Download the Launcher for your Operating System' in red. Below that, it says 'Select your platform and release channel'. A status bar shows 'Detected: Windows (x64) Detected Windows platform'. Under the 'Platform' section, there are four options: 'Windows (x64) Windows 10/11 64-bit' (selected with a green border and checkmark), 'macOS (Apple silicon) Apple silicon Macs (M1/M2/M3/M4)', 'macOS (Intel) Intel-based Macs', and 'Linux (x64) Most modern distributions'. At the bottom, there is a large green button that says 'Download for Windows (x64)'.

**Download Launcher** Download the Launcher for your Operating System

Select your platform and release channel

Detected: **Windows (x64)** Detected Windows platform

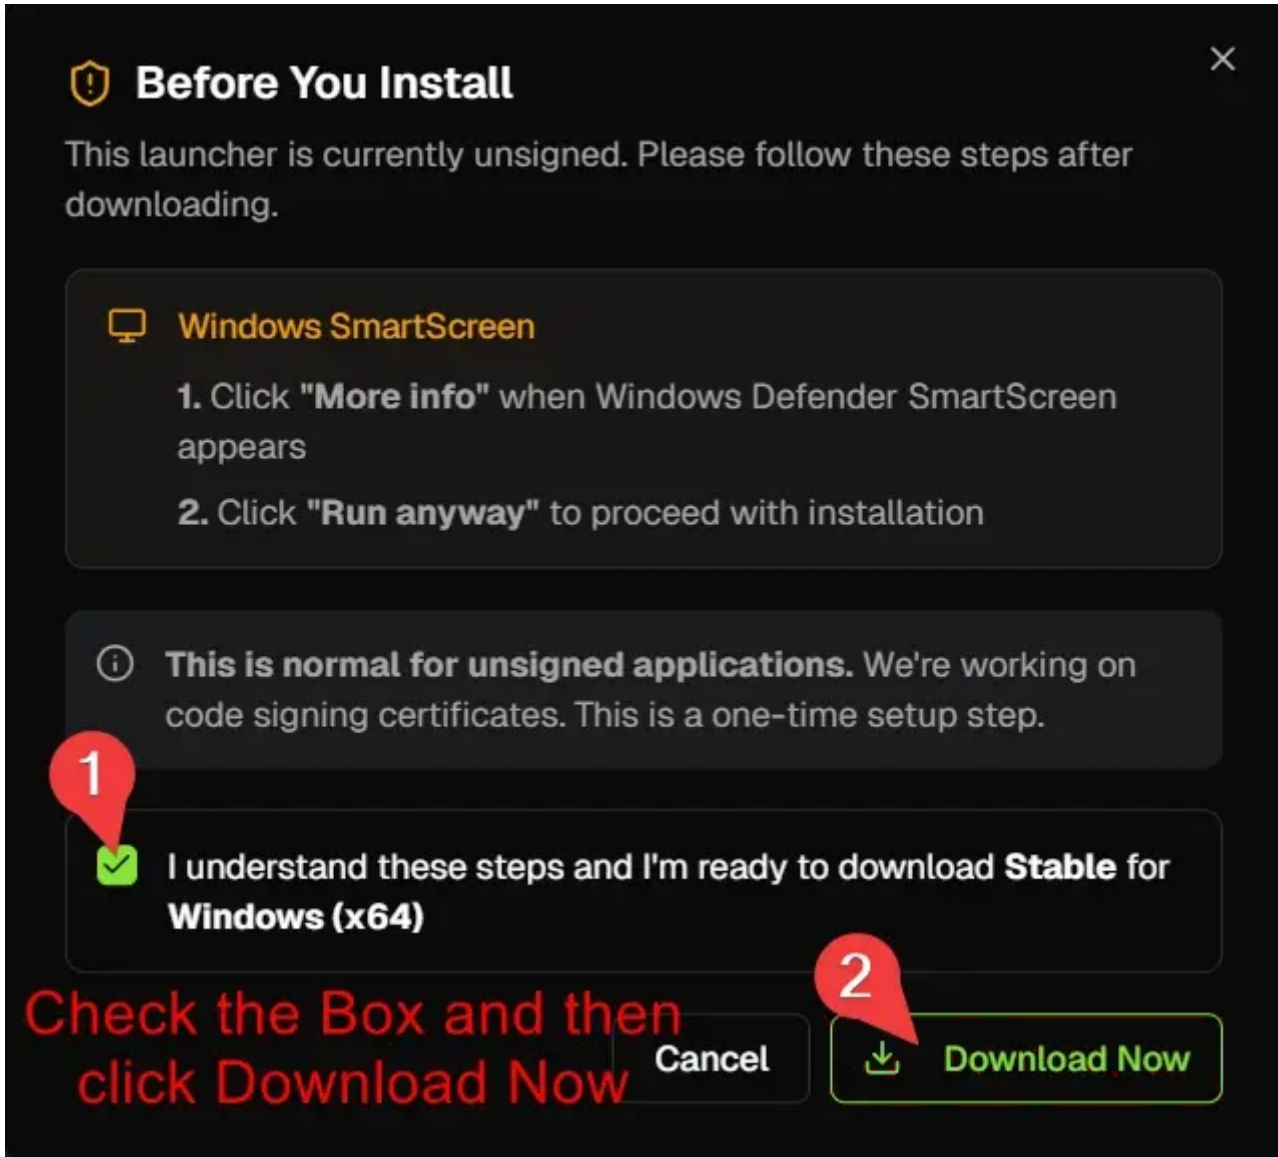

**Platform**

- Windows (x64)**  
Windows 10/11 64-bit
- macOS (Apple silicon)**  
Apple silicon Macs (M1/M2/M3/M4)
- macOS (Intel)**  
Intel-based Macs
- Linux (x64)**  
Most modern distributions

[Download for Windows \(x64\)](#)

- Visit <https://ganomsoftware.com/dashboard/launcher>
- Click "Download" for your Operating System, it should auto select the correct one

## Step 2

**Before You Install** [Close]

This launcher is currently unsigned. Please follow these steps after downloading.

**Windows SmartScreen**

1. Click "**More info**" when Windows Defender SmartScreen appears
2. Click "**Run anyway**" to proceed with installation

**This is normal for unsigned applications.** We're working on code signing certificates. This is a one-time setup step.

**1**  I understand these steps and I'm ready to download **Stable** for **Windows (x64)**

**Check the Box and then click Download Now**

**2**

- Check the box and then click "Download Now"

## Step 3

- Go to where the GanomSoftware Launcher Setup file downloaded, usually the Downloads folder, and run it

## Step 4

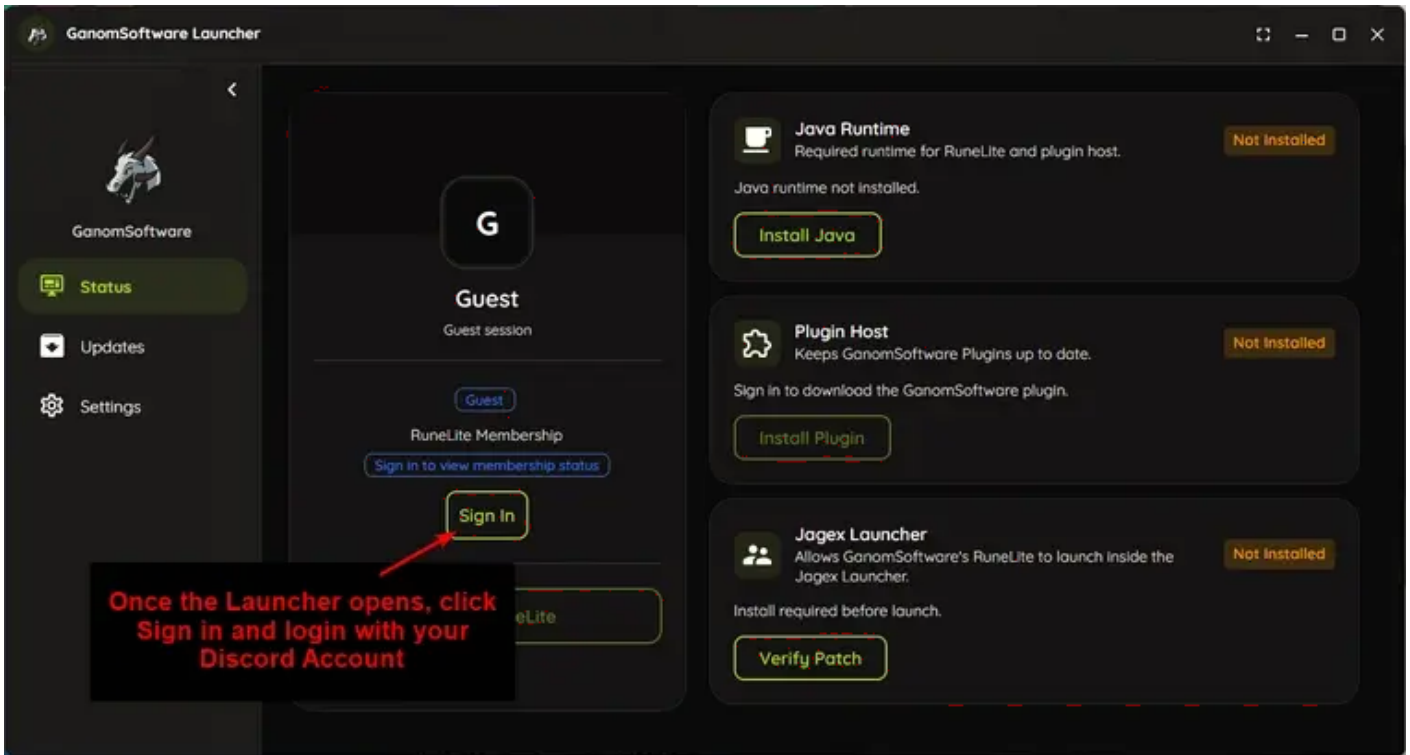

- When you try to run the GanomSoftware Launcher Setup file, you'll get this popup. Click "More Info" and then in the bottom right, click "Run anyways" after it appears

## Step 4.5

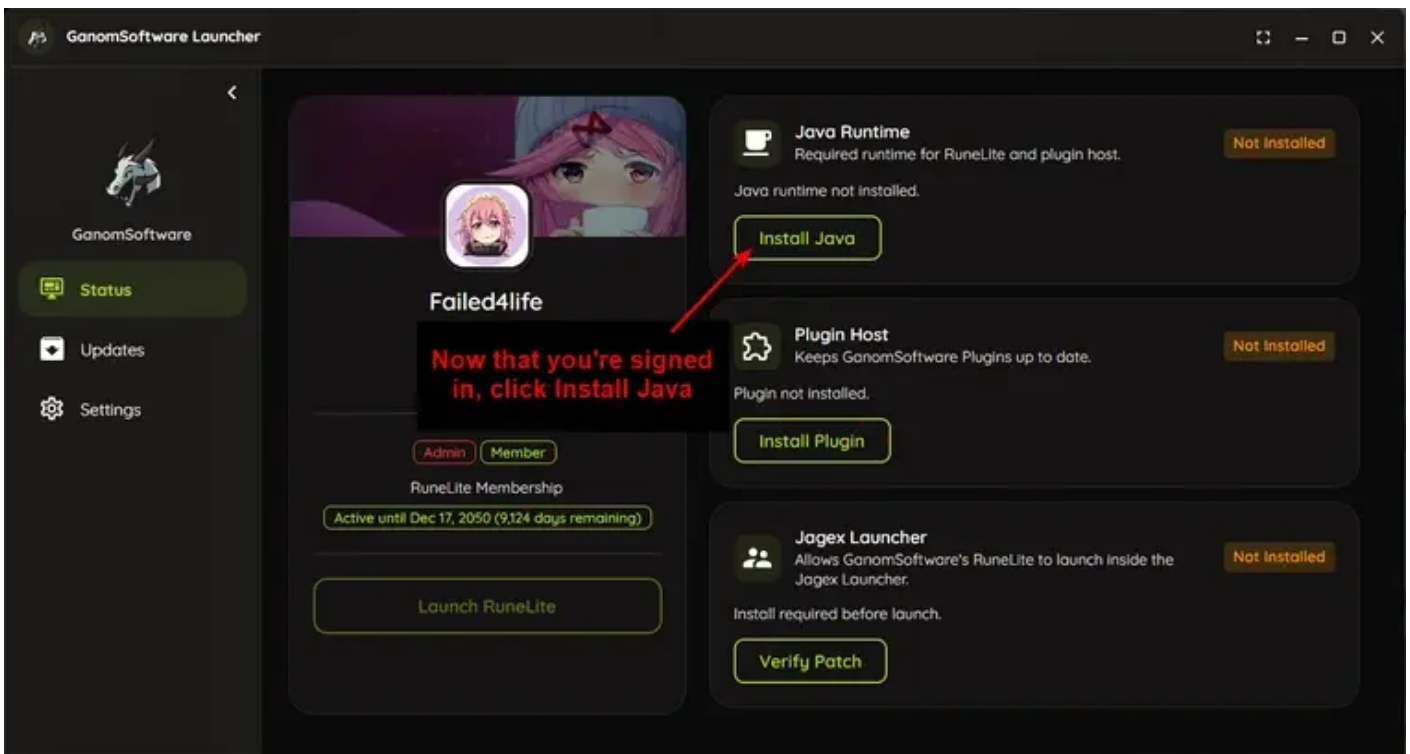

- This is a continuation of Step 4, click "Run anyways" and the GanomSoftware Launcher will install

## Step 5

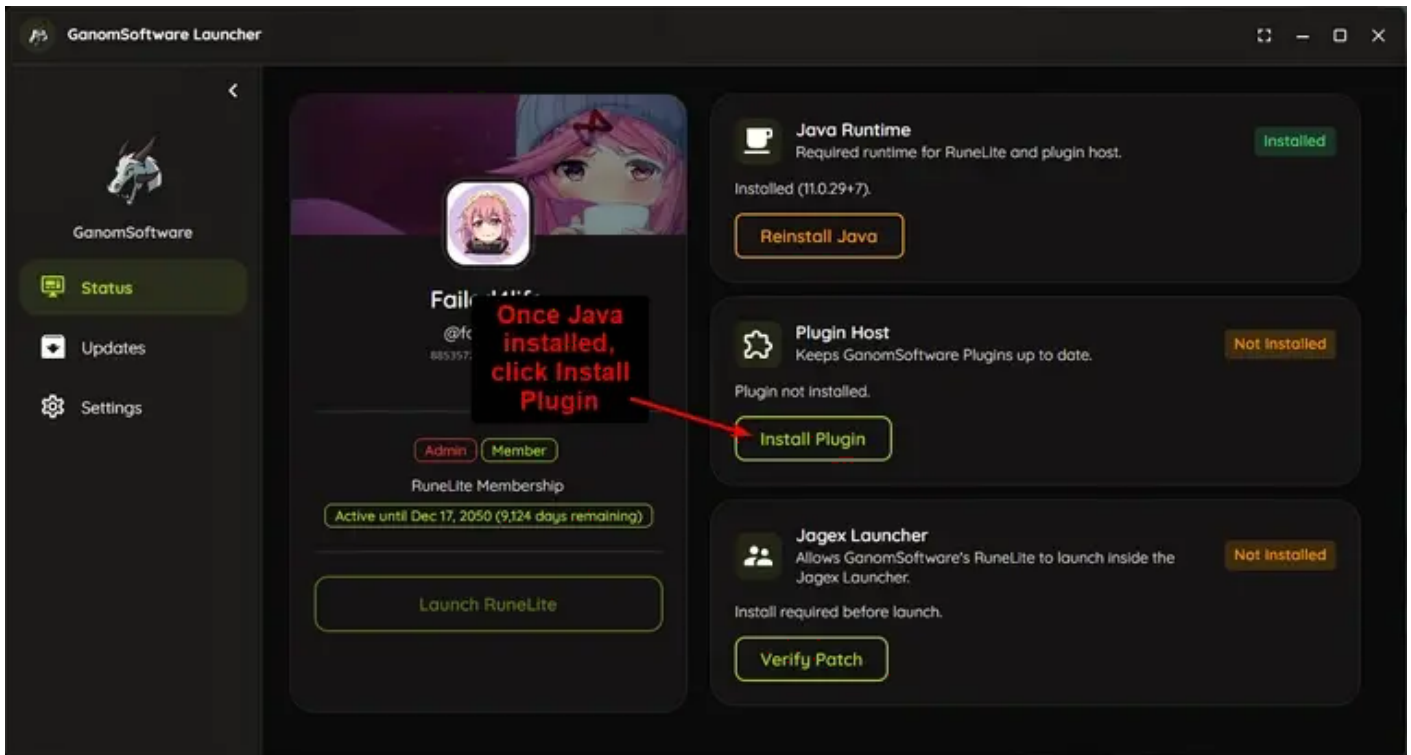

- After you've installed the GanomSoftware Launcher and it opens, click the "Sign in" button and login with your Discord account that you've purchased with

## Step 6

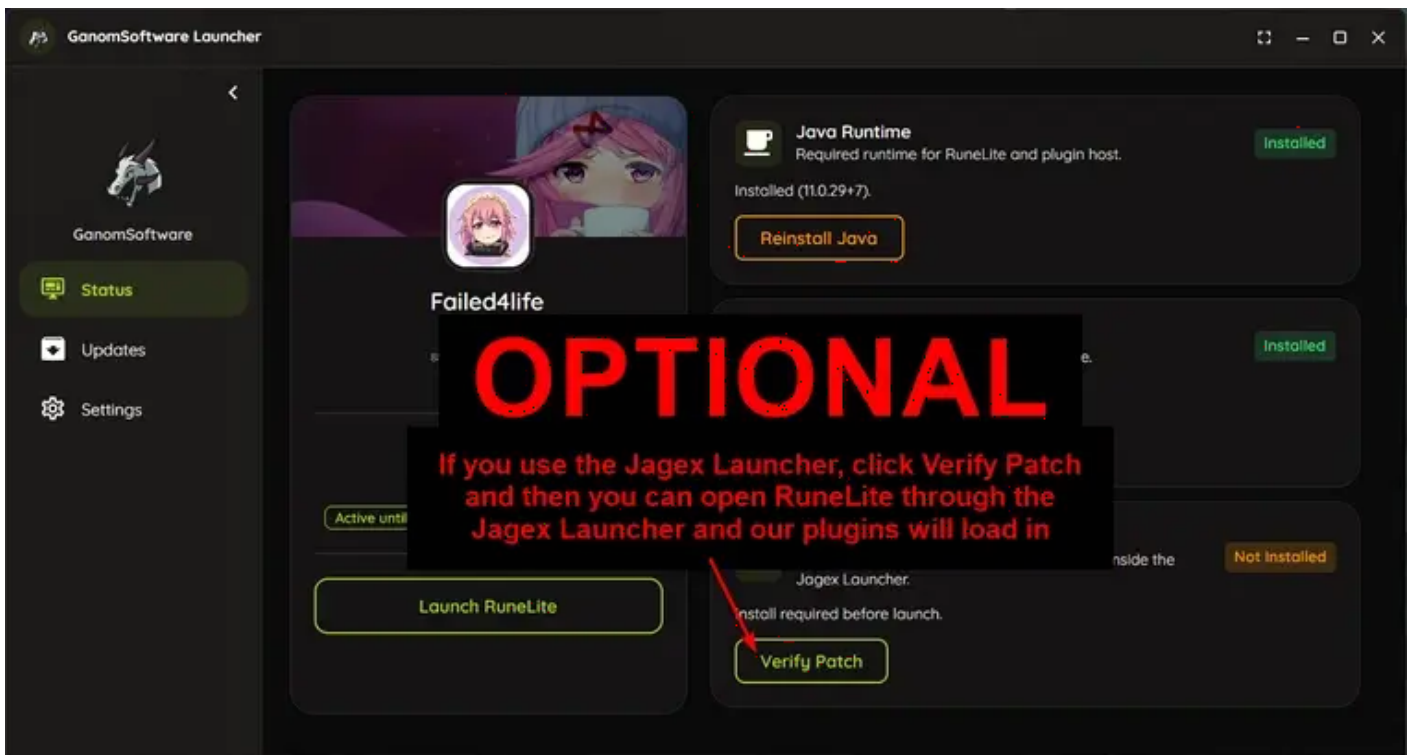

- Once you're logged in, click the Install Java button to install Java 11. Java 11 is required to use our RuneLite plugins

# Step 7

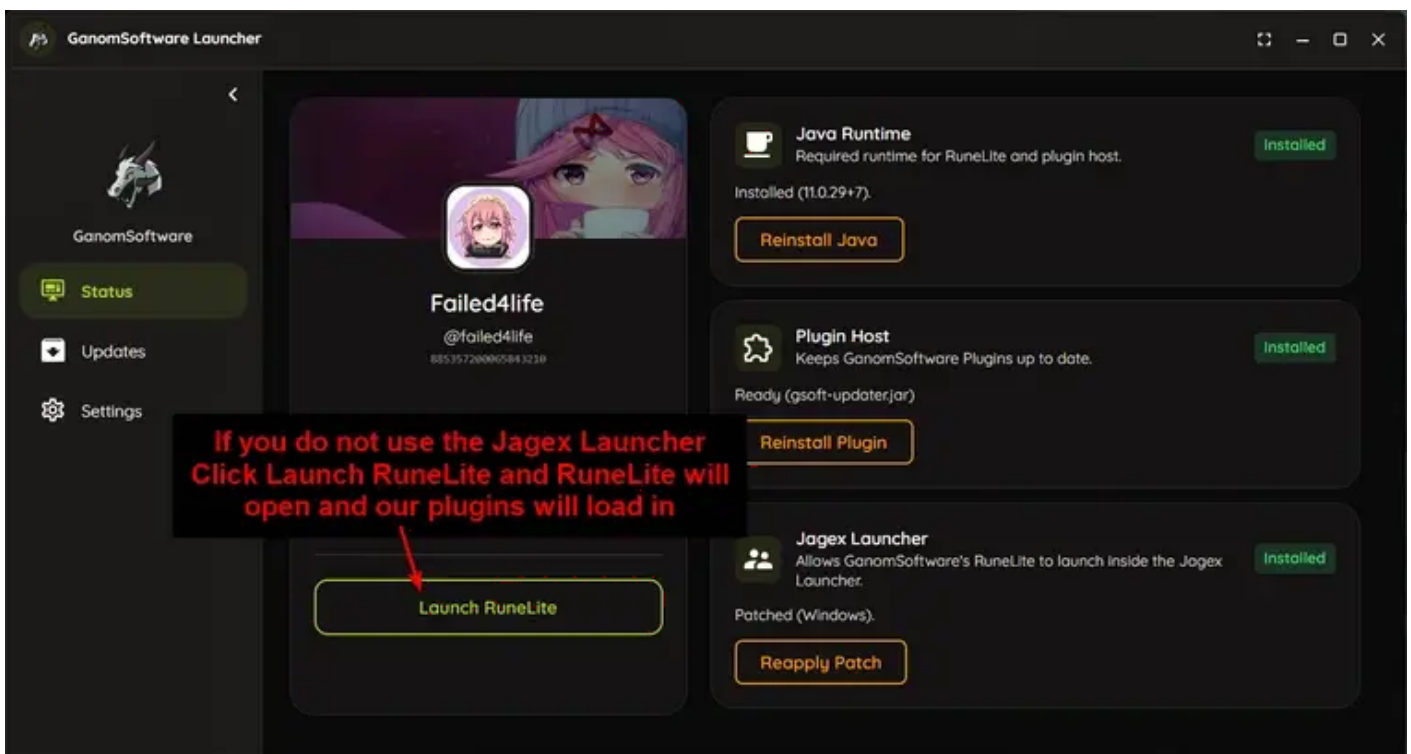

- Next, click the "Install Plugin" button to install our GanomSoftware plugins

# Step 8 (Jagex Launcher/Optional)

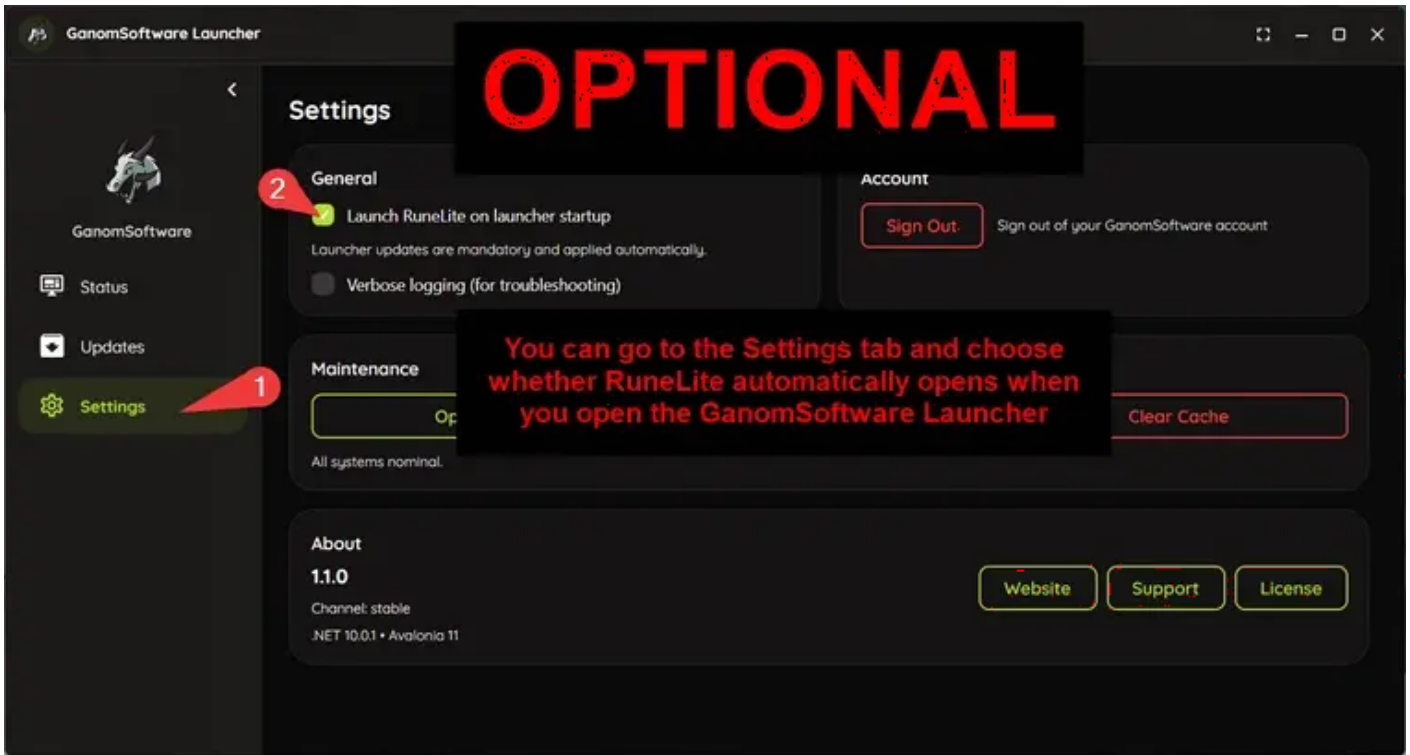

- This step is Optional, if you use the Jagex Launcher, click "Verify Patch" to make our plugins work with the Jagex Launcher. Then you can open RuneLite through the Jagex Launcher as normal and our plugins will load in!
- Note: If you get an error, or your RuneLite client does not open, when trying to open it through the Jagex Launcher, simply reinstall RuneLite from runelite.net and press the "Verify Patch/Reverify Patch" button again and it will resolve the issue!

## Step 8.5 (No Jagex Launcher/Optional)

- If you do not use the Jagex Launcher, click the "Launch RuneLite" button to open RuneLite and our Plugins will load in

## Step 9 (Done/Optional)

- After the first setup, by default, RuneLite will automatically open when you open the GanomSoftware Launcher. If you do not want this, you can go into the Settings tab on the Left and then uncheck "Launch RuneLite on launcher startup". If you use the Jagex Launcher to play, I'd definitely recommend turning this setting off
