

Auto Pray Flick

General Info

- This plugin can be used for a variety of activities other than just to aid in Pray Flicking
- Auto Pray Flick will click where your mouse pointer is, unless MouseEvents is enabled, then it will click on your Quick Prayer Orb
- If you have Double Click Mode turned off, the plugin will do 1 click every game tick, which is useful for various things, some notabable examples being - Enchanting bolts, 1t cooking Karambwans (pair with One Click), using Bones on an Altar (pair with One Click) and the Enchantment room in MTA (pair with One Click)

Config

- Use Mouse Button: If this setting is enabled, the plugin will be activated when you press the specified Mouse Button, rather than using a keyboard hotkey
- Clear Chat if using a keybind: When enabled, if there's anything typed in your chatbox, the plugin will clear it when you activate the plugin
- Flick hotkey: If not using the "Use Mouse Button" setting, click "not set" and press a keyboard button you want as your on/off button
- Hold Mode: This will require you to hold down your hotkey/mouse button to keep the plugin active. When you release, the plugin will deactivate
- Draw Indicator: Shows an indication on your Quick Pray orb if Auto Pray Flick is on/off (Red = Off | Blue = On)
- Use MouseEvents: The plugin will no longer click where your mouse is and will instead click on your Quick Prayer orb - This will increase the risk of a ban
- Only flick in NMZ: Auto Pray Flick will only work if you're inside a NMZ session
