

Auto Spec 2

Initiate Combo

- Click "not set" and press a keyboard button to choose a hotkey that will cause the plugin to do your spec combo
- Automated specs can be done using the "Damage Threshold" setting found lower in the settings

Spec Items

- Enter the ID(s) of the spec weapons you'd like to use, in order from 1st to 4th
- Item IDs can be found by using the Gsoft Manager plugin, enable the "Inventory IDs" setting

Min Spec

- The minimum amount of spec you must have in order to use each weapon

Damage Threshold

- The minimum amount of damage you must hit in a single hit for the spec to auto trigger
- Set this to a high number if you do not want the plugin to auto trigger

Equip Gear on Spec

This section of the config is not for weapons

- `id,id,id` format
- List gear that you want the plugin to equip when it's time to spec, such as switching to a Void melee helm
- Item IDs can be found by using the Gsoft Manager plugin, enable the "Inventory IDs" setting

Enable Prayer

- Choose an offensive boosting prayer to swap to when it's time to spec

Enable Follow Up

This config option is for a follow up weapon

- `id,id,id` format
- Input the weapon ID for the plugin to swap to after spec'ing, such as an Elder Maul, or even back to your main hand/offhand
- Item IDs can be found by using the Gsoft Manager plugin, enable the "Inventory IDs" setting

Enable Overhead Checks

- The plugin will not attempt to spec if the player you're fighting is praying the specified prayer

Disable Distance Checks

This setting is recommended to be checked, especially if using range/mage

- Enabling this will stop the plugin from checking if you are far away from your opponent, or frozen, before attempting to spec

Disable Swap Delay

This setting is recommended to be checked for all spec combos

- Enabling this will remove the delay before swapping to your spec weapons before a valid hit registers
