One Click

General Info

- The purpose of One Click is to take things that would normally take two clicks, and turn them into one. Such as left clicking the Chaos/Gilded altar to use bones on it, or by left clicking on the Vorkath Spawn and automatically having crumble undead be cast on it without needing to go to your spellbook or use a slayer staff.

Advanced Features: Some of the most powerful features of One Click Plugin are the Custom Selections: NPC, Inventory, and Object. While you can enter these manually using the format 'UseThisID:OnThisID' there's a much easier way using 'Shift Right Click'. With One Click enabled and the Custom Options selected, you can now Shift Right Click the item you want to use, select the choice "Select Use -> Item Name" then Shift Right Click the Target of your choice (can be an NPC, an Object, or an Item in your Inventory) and select the choice "Select Target -> <Item/NPC/Object Name>". This will automatically add the correct IDs to the respective sections in the One Click Plugin, making it a hassle-free experience for you.

A common example is using Giant Seaweed on the Tool Leprechaun. You can either enter:

```
21504:7757
21504:0
```

Into the "Custom NPC" section, or you can Shift Right Click on Giant Seaweed in your inventory and select "Select Use -> Giant Seaweed", then Shift Right Click on the Tool Leprechaun and select "Select Target -> Tool Leprechaun" - it really is that easy!

*If you do not want to use the Shift Right Click option you can activate the Inventory IDs, or Examine Debug settings located in the "GSoft Manager" plugin. (Examine Debug will show the ID of anything you right click)

One Click Config

Hold Control (Command if Mac user) and click to enable/disable config options

Custom

- Custom Inv: use inventory Item on inventory Item
- Custom Obj: use inventory Item on Object

- Custom NPC: use inventory Item on NPC

Combat

- Slayer: Left click the monster to use "weakness" items required to kill certain slayer monsters on them when HP reaches a low enough point - without having to click the item first
- Vorkath: Left click use Crumble Undead on the spawn - without having to select the spell or wield a Slayer Staff
- Pray Flick: Rapidly click the Quick Prayer Orb and have it properly time the clicks

Skilling

- Birdhouses: Left click dismantle, place, and use birdhouse seeds on a placed birdhouse
- Bones: repeatedly left click on an altar to automatically use bones on it (pair with Auto Pray Flick with double click mode turned off for laid back prayer training)
- Construction: Left click build and remove!
- Farming Run: Left click on patch to use applicable seeds/saplings and compost them (see Farm Run Config below)
- High Alch: Shift right click on the item you want to alch in inventory, select “Set Alch Target”, then left
  click High Alchemy to automatically cast it on the select item. You can select multiple items and it will
  alch them, in order, from bottom right to top left of your inventory
- Karambwans: Repeatedly left click on a range, or rogues’ den fire, and hold spacebar to perfectly 1t cook

  Karambwans (pair with Auto Pray Flick with double click mode turned off for laid back karambwan cooking)
- Runes: Left click use elemental runes on runecraft altars for easy combo runecrafting (see Rune Config below) - without having to select the runes first
- Superheat: Click the Superheat ore spell without having to select which ore to cast the spell on
- Tele Grab: Left click an item to automatically cast telegarb on it (see Telegrab Config below)
- Tiara: Left click on runecraft altars to craft imbued tiaras - without having to select the tiara first
- Tick Manip: Left click the rock/tree/fishing spot to instantly start a 3t action and then click again with correct timing to 3t with ease - see Tick Config below
- Tithe Farm: Left click plant, use watering cans, refill watering cans and use fertilizer

Minigames

- BA Healers: Left click the healers to automatically use the correct food on it
- Mess Hall: Easily do the Mess Hall minigame with various helpful actions

- MTA: Left click telegrab, high alch, enchant and auto casts b2b when you reach optimal bones in the graveyard room (see MTA Config below)

MTA Config

- Enchant Spell: What enchant spell should be used in the enchantment room? Spam click any shape to pick it up, enchant it and drop the orb (pair with Auto Pray Flick with double click mode turned off for an afk experience)

Farm Run Config

- Compost: Select which plots you want to compost (Ctrl Click to Select Multiple)

Rune Config

- Magic Imbue: Enable this to allow the plugin to cast Magic Imbue before clicking on an altar

Tick Config

- Brain Dead: This will invoke an action upon using a tick manip one click, making tick manipulation bread dead. Click whenever you see the "Use item -> item" prompt in the upper left corner of the screen
  - Only works on Mining/Woodcutting. Must drop your own items

Telegrab Config

- Telegrab IDs: `id,id,id` format of items you want to telegrab without having to select the spell first

Custom Inventory Config

- Custom Inventory: Format is `UseThisItemID:OnThatsItemID`
  - For Example: `6032:13421` will make it so when you click on Saltpetre with Compost in your inventory, it will automatically use it on the Compost

Custom Object Config

- Custom Object: Format is `UseThisItemID:OnThatObjectID`

Custom NPC Config

- Custom NPC: Format is `UseThisItemID:OnThatNPCID`
  - For Example: `6664:496` will make it so you Fishing Explosive on the Krakens' Whirlpool just by clicking on the Whirlpool (I know, awesome right?!)
